PROFESSIONAL SUMMARY

Data analyst and Computer Science graduate who turns messy, raw data into clear answers. Builds the full workflow: collecting data from APIs and web pages, cleaning it with SQL and Pandas, exploring it, and presenting findings in interactive Power BI dashboards. Looking for a data analyst role where I can keep growing and deliver insights that support decisions.

TECHNICAL SKILLS

Languages & Querying:	Python (Pandas, NumPy, Requests, BeautifulSoup), SQL (MySQL, SQL Server)
Analysis & Visualization:	Power BI, DAX, Seaborn, Matplotlib
Tools:	Git, GitHub, Jupyter / Kaggle, Google Colab, PyCharm, MySQL Workbench, VS Code
Core Skills:	Data Cleaning, Exploratory Data Analysis (EDA), Web Scraping, REST APIs, Window Functions & CTEs, Data Visualization

PROJECTS

Tech Layoffs Analysis — SQL Data Cleaning & EDA | MySQL · CTEs · Window Functions — GitHub

- Cleaned a global tech layoffs dataset in MySQL: removed duplicates with ROW Number () and staging tables, standardized company and industry names, and handled null values.
- Analysed the cleaned data with rolling totals and ranking window functions to show layoff trends over time and the companies and industries with the most job cuts.

Data Professional Survey Dashboard | Power BI — GitHub

- Built an interactive Power BI dashboard on global salary trends, programming language preferences and workplace happiness among data professionals.
- Designed interactive visuals so viewers can explore salary, language preference and happiness results themselves.

Crypto Market Analysis with API | Python · REST API · Pandas · Seaborn — Kaggle notebook

- Pulled live data for the top 500 cryptocurrencies from the CoinMarketCap API using Python Requests and flattened the nested JSON into a Pandas DataFrame.
- Reshaped 1-hour to 90-day price-change data and built Seaborn charts comparing coin performance across time periods.

Customer Churn Analysis | Python · Pandas · SQLite · Seaborn · Matplotlib — GitHub

- Merged 3 relational SQLite tables (customers, subscriptions, support), cleaned inconsistent labels, missing values and duplicates, and engineered churn flag, tenure, complaint count and risk-tier features.
- Found a 28.6% overall churn rate: Basic-plan users churn at 60% and referral signups at 83%. Escalated complaints correlate with churn (r = 0.65), pointing to where retention effort should go first.

EDUCATION

University of Engineering and Technology (UET) Peshawar, Jalozai Campus — Pakistan

Bachelor of Science in Computer Science

Relevant coursework: Database Management Systems, Data Structures, Algorithms, Statistics, Artificial Intelligence

LEADERSHIP & ACTIVITIES

Security Head — University Society — UET Jalozai Campus

- Led event security planning, coordinated team assignments and maintained order at large campus events.

Basketball Head — University Expo — UET Jalozai Campus

- Organized tournament brackets, equipment and schedules for participants and attendees.
